Work Experience

Full Stack Developer, DIGIEYE 07/2025 – 10/2025 | Casablanca

- Built a Jupyter-style notebook interface.
- Designed a conversational AI chatbot UI to enhance user interaction with autonomous agents.
- Implemented a low-code drag-and-drop application builder.
- Contributed to an AI-powered workflow assistant that generates and explains automation processes within a visual orchestration system.

Frontend Developer, RLinks 04/2025 – 06/2025 | Remote

- Built the customer-facing food ordering website from scratch, allowing users to browse menus and place orders online.
- Contributed to the restaurant dashboard by fixing bugs and improving order tracking and management features.

Full Stack Software Engineer, Outlier 01/2025 – 04/2025 | Remote

- Reviewed and tested AI-generated code, identifying issues and comparing implementations for correctness.
- Debugged and corrected faulty or incomplete code.
- Stress-tested models to uncover edge cases and failure scenarios.

Full Stack Developer, ATJ Consulting 11/2023 – 05/2024 | Remote

- Built a web application for bulk WhatsApp messaging, handling contact management, message scheduling, real-time updates, and payment integration.
- Successfully migrated a corporate website from Laravel PHP to a modern stack utilizing Vue.js and PayloadCMS.
- Contributed to the frontend development of a mobile playdate scheduling application, building and refining user interface components.

Personal and Academic Endeavors

HyperTube, Frontend Developer 04/2025 – 06/2025

Developed a web application for searching and streaming videos, featuring user authentication, secure user account management, and a responsive UI with mobile compatibility, along with real-time video search and streaming capabilities, powered by a BitTorrent-based video player.

PIPO, Backend Developer 06/2023 – 08/2023

Developed a real-time multiplayer Pong website with user authentication, user account features, and a secure real-time chat system, including OAuth2 login, two-factor authentication, public/private/protected channels, direct messaging, and robust APIs.

Education
